

## DM200-BD

### Playable Blu-ray Disc Maker for Camcorders and High-Res Cameras Hi-speed Standalone Portable BD Burner for Burning Videos/Photos into A Playable Blu-ray Disc with NO PC NEEDED!

#### Feature

- Record video / photo files directly from camcorders and digital cameras via USB connection with NO PC NEED!
- The recorded BD / DVD disc can be directly played back on the regular Blu-ray Disc players
- Keep the video resolution and photo image quality at the same level as their original data source with no distortion or downgrade
- Hi-speed file transfer performance much faster than the real time recording from A/V ports
- Offload large video files to free up the capacity in the camcorders or cameras
- Advanced Disc Spanning feature prompts additional discs automatically when source data larger than target disc in capacity is detected, which allows data file to span over multiple discs
- Designed to support the latest models of high-res cameras, Camcorders, and BD players available in the market
- Two built-in card reader slots (CF Type I/II and Multiple Card Slot) with full compatibility to support most major memory card formats
- Fast and reliable data recording from memory cards or USB devices to BD /DVD
- User Friendly Interface: Graphic LCD display with backlit
